Welcome to KHALIFA DIGITAL SOLUTIONS

Established in 2021, KDS is a dynamic digital solutions company that specializes in offering end-to-end digitization solutions to start-ups, SMMEs, and corporate companies around the globe. As a world-class digital partner, we aim to build custom strategies that allow organizations to make business processes faster, enabling continued growth and innovation for years to come.

With an advance 4IR approach that puts us miles ahead of our competitors, KDS was founded on the principles of initiating, sustaining, and revolutionizing digital transformation for our clients. Driven to help businesses optimize their operations, we spearhead the entire digitization lifecycle, from creating tailored strategies to implementing initiatives that transform organizational procedures.

At KDS, we believe in the power of communication to comprehend the needs of our customers. By leveraging the power of technology, KDS focuses on finding innovative ways to establish a secure and sustainable online presence for our clients at all levels.

Our Services

From large Fortune 500 companies to local small businesses, we have helped hundreds of companies secure their most valuable data. Our solutions are customized to meet your needs and requirements. When you're ready to secure your organization, choose us as your partner.

The average cost of a data breach is \$3.92 million. We help to prevent breaches and keep your company safe. Fortune 500 companies, government agencies, educational, and non-profits are among the organizations targeted every day – many of whom are woefully unprepared to respond to security incidents. That's where we come in. With decades of combined experience, thousands of hours of practice, and core values from our time in service, we will use our skill set to secure your environment.

DIGITAL MARKETING

Our projects have a strong focus on engaging audiences and creating a wonderful and holistic digital experience. We are driven by latest trends, techniques and effective online marketing strategies, website design, content creation and social media campaigns.

CYBER SECURITY

KDS Security provides client-tailored and compliance-tailored testing packages, including GDPR, SOX, HIPAA, NIST, PCI-DSS, and the CIS Top 20.

SECURITY

Physical Manned Security Solutions KDS Security team members all have extensive training and have the capability to respond to any situation quickly and safely.

DIGITAL MARKETING SERVICES

Our projects have a strong focus on engaging audiences and creating a wonderful and holistic digital experience. We are driven by latest trends, techniques and effective online marketing strategies, website design, content creation and social media campaigns.

SEO SERVICES

Want your website to rank higher? We will increase your Search Engine Rankings driving more traffic to your website. More traffic equals more conversions (bookings/sales/sign-ups) and increased brand awareness.

WEBSITE DEVELOPMENT

Time for a fresh, new website to maximise your online presence? We create unique, easy to use and responsive websites that adjust to fit all device screens be it a computer, tablet or smartphone.

PAID SEARCH/CPC

Do you want to increase relevant traffic to your website and increase your conversion rate? We set up & manage paid search engine advertising to push those visitor numbers up immediately.

B2C SOCIAL MEDIA MARKETING

Want to harness the power of Social Media Marketing? We will manage your social media presence and increase your Likes, Tweets, Pins and Shares whilst leading people to your products and services.

SMB & STARTUP SEO

Your startup or small business requires SEO to have a presence on the web in order to compete but not all businesses have the budgets for these processes. Finally we have something that can help!

APP DEVELOPMENT

Think your business could benefit from having an app? We pride ourselves in our ability to develop high quality, innovative, and engaging web and mobile apps across platforms including iOS and Android.

DIGITAL STRATEGY

Looking for a fresh new digital strategy? We'll help you create the important foundation of a successful digital marketing plan, and implement it to achieve your goals and gain more traffic, leads and business.

B2B SOCIAL MEDIA MARKETING

Do you want to reach B2B decision-makers? Social media is a powerful tool for business-to-business companies. We will set up, manage and market your B2B social media channels to help drive connections and grow your business.

WSS

Web Security as a Service.

AAS

Application Security as a Service.
Virtual security strategies.

CYBER SECURITY SERVICES

Digital Forensics

KDS-Security offers the skills and tools necessary to conduct digital forensic analysis across various Operating Systems. Our discovery solutions include large-scale searches or audits, and our lab provides large-scale investigation and processing. KDS-Security recovers digital evidence from mobile devices under forensically sound conditions, using accepted methods. This would involve analysing SIM cards, memory cards and the handset itself. Our forensic analysis of mobile phones can be carried out on various forms of data, including SMS's, images, videos and audio files. KDS-Security provides forensic duplication that ensures every bit on the source is retained, including deleted files. This ensures the data can act as admissible evidence in court proceedings.

Information Protection and Control

The protection of information is critical in today's threatened landscape, where it equals revenue. Understanding data breaches, accompanied by significant statistics relating to financial losses and the integrity of company brand value, allowing us to help you get a better understanding of what is at stake. At KDS-Security we pride ourselves in being able to assist our clients to manage the governance and assurance techniques required to enable you to deal with the issue of protecting your company's information, as well as understanding the lifecycle and flow of intellectual property.

We focus on:

- Data protection across the organization: Network or endpoint.
- Encryption.
- Device control.
- Application control.
- Prevention readiness.
- Monitoring.
- User behavioral changes.
- Reporting and business DLP success metrics.
- Ongoing services to empower clients.

Malware Protection and Analysis

We have partnered with global managed digital security service providers to offer extensive malicious code analysis expertise, powered by the Counter Threat Unit research team. Using advanced computer forensic tools and techniques, our experts thoroughly dissect malware from a security incident to determine its functionality, purpose, composition and source. Our security experts provide a brief technical document outlining the results of their analysis. We offer an opinion on the malware code's potential impact to your organization, and its effect on your networks, systems and information assets. Most importantly, our experts will detail recommendations for malware removal and recovery activities.

Anti-malware focus and analysis drives:

- Customer satisfaction.
- Unsurpassed protection.
- Unwavering support capabilities.
- Service level agreements that deliver results.
- Customer security maturity strategies.
- Customer partnership models.

SECURITY AUDITING & CONSULTATION

Our talented engineers have decades of experience assisting customers with their security needs.

SECURITY RISK ASSESSMENT

A security risk assessment evaluates the potential threats to your organization and the risks to the confidentiality, integrity, and availability of information.

CLOUD SECURITY ASSESSMENT

A cloud security assessment evaluates your organization's cloud infrastructure and helps secure your critical cloud assets.

CONSOLE ARCHITECTURE ASSESSMENT

A console architecture assessment considers the perimeter and internal network architectures and configurations.

SECURITY GAP ANALYSIS

A security gap analysis is a review of your organization's security posture.

HOST COMPLIANCE & MALWARE AUDIT

A host compliance audit evaluates your devices for security best-practices.

PASSWORD AUDIT

A password audit is the evaluation of your organization's password policy.

SECURITY POLICY ASSESSMENT

A security policy assessment is the evaluation of your organization's current security policies.

INCIDENT RESPONSE

Unfortunately, security breaches happen. Our team is here to respond as soon as you suspect a

TAILORED CONSULTING

Sometimes, your organization doesn't fit into "off the rack" assessments and that's okay.

SECURITY
